

Boiler

MODEL BW9 Gas-Fired Hydronic

Preferred[™]
SERIES

A Boiler from Bryant Ho

Put Your Trust in Bryant

For more than ninety years, Bryant has been your trusted friend in the heating business. Winter after winter, we've been keeping people just like you comfortable with heating systems designed to meet every conceivable need. That legacy of comfort continues with Bryant's versatile Plus Series Model BW9 gas-fired hydronic boiler.

With a Bryant boiler, you can heat your home with confidence knowing that this product is built to last. Because it's a boiler, it delivers consistent, draft-free heating. Because it's from Bryant, it offers reliable, energy-saving performance installed by a qualified professional dealer.

Engineered for Efficiency

The Bryant Plus Series Model BW9 boiler is designed and built to heat your home quickly and economically. The cast aluminum heat exchanger transfers heat three times faster than conventional cast iron, allowing for faster heat-up, better operating efficiency and greater thermal storage. For the homeowner, this translates into comfortable heating when you need it at a lower operating cost.

Competitive boilers may require add-on devices to boost efficiency and improve operation, but those benefits have already been

engineered into the Plus Series Model BW9. In addition to the 90% AFUE rating, this model reduces your installation costs by using inexpensive PVC pipe for air intake and exhaust. And you'll be glad to know, the air intake pipe draws fresh air from outdoors, rather than pulling air out of your home. The sealed combustion system, premix burner, and low-flame temperature means reduced exhaust emissions, which contribute to a cleaner and healthier environment.

Advanced, Yet Simple

The Bryant Plus Series Model BW9 boiler is known not only for its reliable, high efficiency cast aluminum heat exchanger, but also for its easy maintenance and dependable operation. Easily accessible components and a self-diagnostic system help reduce the time it takes for routine servicing.

Weighing just 220 pounds and featuring a PVC vent system, the Plus Series Model BW9 boiler is quick and easy to install. Heating comfort is assured by an integrated boiler control that provides responsive heating and reliable operation. And that's exactly what you've come to expect with a boiler from Bryant.

Heats Reliably and Efficiently.

Warranty

To the original owner, the Bryant model BW9 boiler is covered by a 5-year parts limited warranty and a 15-year parts limited warranty on the heat exchanger section. Ask your Bryant dealer about optional extended warranties, which may include labor. See warranty certificate at bryant.com for complete details.

Performance

As an ENERGY STAR® Partner, Bryant Heating & Cooling Systems has determined that this product has combinations that meet the ENERGY STAR® guidelines for energy efficiency.

Quality You Can Trust

For more than ninety years, Bryant has maintained the trust of people just like you by continuously improving its product line. As the technology and the products change, one thing remains consistent: quality. From first concept to final assembly, Bryant leads the industry in quality control through a strict program of reliability testing. That means when you choose Bryant, you're choosing a history of solid, dependable products built with you in mind.

Bryant thermostats are designed to work with your new boiler for enhanced system performance. Ask your Bryant dealer about a thermostat that makes the most sense for your comfort needs.

Home Comfort Components

Model BW9

- 1 INTEGRATED BOILER CONTROL**
Provides heating comfort the way you like it, when you like it.
- 2 ECONOMICAL PVC VENT SYSTEM**
Sealed system allows fresh combustion air to be drawn in from outside the home and flue gas to be safely vented outdoors.
- 3 INDUCED DRAFT FAN**
Quietly and precisely controls combustion air through the boiler for high efficiency heating.
- 4 CAST ALUMINUM HEAT EXCHANGER**
Transfers heat three times faster than cast iron for quicker heat-up and lower operating costs.
