Heil® Ductless Systems

Comfort Anywhere You Want It

HEATING & COOLING PRODUCTS
Depend On Us.

Enjoy more comfort where there's no space for ductwork, to remedy hot/cold problem areas, or to simply enhance a room.

With a Heil® ductless system, your spaces will have energy efficiency and flexibility in places your standard system can't reach.

What is a Heil ductless system?

Heil ductless systems use heat pump technology in two separate units:

Indoor

The indoor unit is mounted in your space and connected by a refrigerant line and wires to an outdoor unit. It eliminates the need for ductwork while allowing greater installation flexibility for comfort where you need it. If you have more than one problem space, up to nine indoor units can be installed with one outdoor unit.

Outdoor

The outdoor unit houses the compressor, which uses variable-speed inverter technology to automatically adjust to your preferred temperatures. It runs quietly and efficiently for a smart comfort solution.

A quieter, more efficient alternative to other devices like baseboard heating or electric devices.

A Perfect Addition to Any Space

Cooling
UP TO 130° F

Heating
DOWN TO -22° F

Indoor
Installation flexibility

Heil ductless systems can be installed virtually **anywhere.**

Outdoor
Quiet and efficient

Comfort Where It Counts

When you choose a better comfort solution, you expect high performance and convenient perks. Heil ductless systems add comfort with ease in three ways:

Comfort Technology — The Heil ductless system's inverter-driven compressor can achieve heating down to -22° F and cooling up to 130° F. So even in the most extreme conditions, you can count on comfort.

Wi-Fi® Control — Our top-of-the-line ductless systems come equipped with Wi-Fi® control so you can adjust your comfort levels while in your home from your smartphone. All of our units feature wireless remote control for simple programming at your fingertips.

Low-Key Design — Heil ductless systems make comfort even better with a low profile design that offers quiet performance so you barely notice it's there.

Comfort Where You Need It

There's no room too small or space too large for Heil ductless systems. They can go anywhere. Whether it's a space with no ductwork, to enhance a room or to remedy hot or cold problem areas, Heil ductless systems have a solution to match your needs.

WHAT DUCTLESS SYSTEM IS RIGHT FOR YOU?

●○○

SINGLE-ZONE

A ductless air conditioner or heat pump can be installed with just one indoor unit and one outdoor unit. The indoor unit can be installed virtually anywhere in your home to create more comfort in spaces other systems don't reach.

●●●

MULTI-ZONE

One outdoor compressor can power **up to nine** indoor units in your home. Each indoor unit is controlled separately by a wireless remote to offer more comfort flexibility. And you can add convenience to home projects by installing more units in the future if you have already installed at least two indoor units (depending on the maximum allowed for your unit).

INSTALLS VIRTUALLY ANYWHERE	UNOBTRUSIVE DESIGN	UP TO 30.5 SEER/ 10.3 HSPF	ENHANCES EXISTING DUCTED SYSTEMS	ENERGY STAR® QUALIFIED	QUIET OPERATION

Ask your Heil dealer which ductless system is right for your comfort needs.
